PHARMACOLOGY FOR MEDICAL CAREERS

Train students in pharmacology for all health care professions with the PassAssured program. Nurses, physicians, pharmacy technicians and all other medical professions require pharmacology.

PassAssured's Pharmacy Technician Training Program (PTTP) was written by a pharmacist. The course is completely online and may be used as a complete class, a class within a class, independent or distance learning.

After successfully completing the PTTP, students have the option to take the ExCPT (Exam for Certification of Pharmacy Technicians) up to 30 days prior to graduation or the PTCB (Pharmacy Technician Certification Board) Exam.

To register as a pharmacy technician in Texas, an individual must have current certification through the ExCPT or the PTCB.

According to the Bureau of U.S. Labor and Statistics, Texas employs over 33,030 pharmacy technicians with an hourly mean wage of \$15.90, or \$33,080.00 per year.

PTTP and ExCPT Bundle	
PTTP	\$299
ExCPT Practice Tests (5 maximum)	\$35
ExCPT Certifying Exam	\$115
Subtotal	\$449
