## Math Around Town

This guide links the Math Around Town unit to the Texas Essential Knowledge and Skills (TEKS) for fourth graders. Math Around Town is a mathematics unit that allows students to discover the uses of math in the real world, using interviews with professionals who need math skills for their jobs. Though a mathematics unit, Math Around Town also leads students to practice skills in the other subject areas of English language arts, science, and social studies. For example, students use critical thinking and problem solving, which the science TEKS require, and writing and research skills, which the English Language Arts and Reading and Social Studies TEKS include. The following document includes the applicable TEKS and the details of the Math Around Town unit. The asterisks indicate that those TEKS are testable on the State of Texas Assessments of Academic Readiness (STAAR). The final section of this document presents the applicable Texas College and Career Readiness Standards adopted by the Texas Higher Education Coordinating Board (THECB) on January 24, 2008.

## Description of Unit

Students will learn about real-life mathematics applications in the world around them.

## Goals

Students will meet these goals in their explorations:

- Discover ways in which students use mathematics in and out of school
- Investigate ways in which professionals use mathematics in their work
- Create problems that illustrate how professionals use mathematics concepts in real-world problem situations

## Phase I. Learning Experiences

1. Read Math Curse, by Jon Scieszka and Lane Smith, to students.

- As a whole class, students brainstorm all of the examples of mathematics that they have encountered that day. Then in small groups, students categorize these examples according to mathematics concepts taught in fourth grade.
- In partner teams of two or more, students work the problems in the book Math Curse. (Answer key provided-See Attachment \#1.) Students classify each of the problems in the book as one of the following: basic math facts, basic math problem solving, higherlevel math problem solving, you've-got-a-problem-but-it-isn't-math, or you-asked-the-wrong-question math problem (credit to Suzy Red in Lockhart, TX). Use Math Curse Problem Categorization-Attachment \#2.
- Using the Math Curse format, each student will spend a day recording in a journal how he/she uses mathematics in everyday activities at home and school. He/she then will create Parallel Problems based on journal entries similar to those in Attachment \#3Parallel Problems.

2. To demonstrate other applications of math skills in real life, students solve multi-step mathematics problems. (See Attachments \#4 and \#5-Pizza Party and Cover It Up.) You may wish to select various student examples that illustrate the diversity of solutions and follow up with a discussion. This will allow students to compare problem-solving strategies and understand that there are many ways to solve a problem.
3. To show how mathematics is used in careers, each student will complete one of the career-based mathematics problems attachments-Movie Mania, TV Show, or Golf Course Construction—and will write a brief summary of how they arrived at each answer. (See Attachments \#10, \#11, or \#12.)

## Phase II. Independent Research

## A. Research process

1. Each student will select a career to study. A primary focus is to find out how mathematics is used in that career, though the student may want to learn about other aspects of that career as well. To get started, give students a list of careers (Attachment \#6-Occupations) that reflect the composition of the workforce in your community. Using the list or other resources, each student will choose a career in which professionals rely heavily upon mathematics skills. You may wish to use http://www.bls.gov/k12/ to help students explore their own career interests.
2. Each student will prepare a set of interview questions and will conduct an interview with a person in the field of work identified for study. He/she should try to discover all of the mathematical applications used in that person's job.

- Use Attachment \#7-Interview Questions \& Answers, to write questions and record answers.
- Use Attachment \#8—Job-related Math Skills, to identify which mathematical concepts interviewees use on their jobs on a regular basis.
- Use Attachment \#9—Interview Math Problems, with samples of math problems the interviewee encounters on the job.

## B. The product

Math Around Town (Grade 4)

Each student will develop a board game or a learning center based on how math is used in the career studied.

- The game should include fair rules and nine mathematics concepts found in the fourth grade TEKS. (See Attachment \#13.)
- A learning center for another grade level should show how mathematics is used in a particular career. Centers must include directions and manipulatives for each activity. (See Attachment \#14.)

## C. Communication

Each student will participate in a "job interview" in which he/she demonstrates knowledge of the role of mathematics in the career of study. The student may want to dress as a person in that career and discuss the different ways in which math is important to the jobs they studied. The interview should be audiotaped or videotaped.

The student should write questions for the interviewer. Some questions the interviewer may ask include the following:

- How has the way the people in that job use math changed over time?
- What math tools did they use in the past that they do not use now?
- What math tools do they use now that they did not use in the past?

## D. Submission

a. The cover sheet
b. Attachment \#7—Interview Questions \& Answers
c. Attachment \#8—Job-related Math Skills
d. Attachment \#9—Interview Math Problems
e. Product-Attachment \#13 or \#14
f. Audiotape or videotape of job interview, including the Q\&A session

## Texas Essential Knowledge and Skills

The unit may address the following TEKS:

| English Language Arts and Reading: |  |
| :--- | :--- |
| 4.1 | Reads grade-level text with fluency and comprehension <br> 4.2Understands new vocabulary and uses it when reading and writing* (Testable on the Grade 4 <br> Reading STAAR, Reporting Category 1) |
| 4.9 | Reads independently for sustained periods of time and produces evidence of their reading <br> Analyzes, makes inferences, and draws conclusions about the author's purpose in cultural, <br> historical, and contemporary contexts and provides evidence from the text to support their <br> understanding |
| 4.11 | Analyzes, makes inferences, and draws conclusions about expository text and provide <br> evidence from text to support their understanding |
| 4.14 | Uses comprehension skills to analyze how words, images, graphics, and sounds work together <br> in various forms to impact meaning* (Testable on the Grade 4 Reading STAAR, Reporting <br> Category 2) |

Math Around Town (Grade 4)
Texas Performance Standards Project
© 2008 Texas Education Agency
4.18 Writes expository and procedural or work-related texts to communicate ideas and information to specific audiences for specific purposes* (Testable on the Grade 4 Writing STAAR, Reporting Category 1, Reporting Category 2)
4.20 Understands the function of and uses the conventions of academic language when speaking and writing* (Testable on the Grade 4 Writing STAAR, Reporting Category 3)
4.21 Writes legibly and uses appropriate capitalization and punctuation conventions in their compositions* (Testable on the Grade 4 Writing STAAR, Reporting Category 3)
4.22 Spells correctly* (Testable on the Grade 4 Writing STAAR, Reporting Category 3)
4.23 Asks open-ended research questions and develops a plan for answering them
4.24 Determines, locates, and explores the full range of relevant sources addressing a research question and systematically records the information they gather
4.25 Clarifies research questions and evaluates and synthesizes collected information
4.27 Uses comprehension skills to listen attentively to others in formal and informal settings
4.28

Speaks clearly and to the point, using the conventions of language
4.29 Works productively with others in teams

## Mathematics:

4.1 Uses mathematical processes to acquire and demonstrate mathematical understanding
4.4 Applies mathematical process standards to develop and use strategies and methods for whole number computations and decimal sums and differences in order to solve problems with efficiency and accuracy
4.6 Applies mathematical process standards to analyze geometric attributes in order to develop generalizations about their properties
4.8 Applies mathematical process standards to select appropriate customary and metric units, strategies, and tools to solve problems involving measurement
4.9 Applies mathematical process standards to solve problems by collecting, organizing, displaying, and interpreting data
4.10 Applies mathematical process standards to manage one's financial resources effectively for lifetime financial security
5.1 Uses mathematical processes to acquire and demonstrate mathematical understanding
5.3 Applies mathematical process standards to develop and use strategies and methods for positive rational number computations in order to solve problems with efficiency and accuracy
5.7 Applies mathematical process standards to select appropriate units, strategies, and tools to solve problems involving measurement
5.9 Applies mathematical process standards to solve problems by collecting, organizing, displaying, and interpreting data
5.10 Applies mathematical process standards to manage one's financial resources effectively for lifetime financial security

## Science:

4.3 Uses critical thinking and scientific problem solving to make informed decisions* (Testable on the Grade 5 Science STAAR)

| 4.4 | Knows how to use a variety of tools, materials, equipment, and models to conduct science <br> inquiry* (Testable on the Grade 5 Science STAAR) |
| :--- | :--- |
| 4.5 | Knows that matter has measurable physical properties and those properties determine how <br> matter is classified, changed, and used* (Testable on the Grade 5 Science STAAR, Reporting <br> Category 1) |
| Social Studies: |  |

## Texas College and Career Readiness Standards

This unit may address the following Texas College and Career Readiness Standards:

## English Language Arts:

| I.A. 2 | Generates ideas and gathers information relevant to the topic and purpose, keeping careful <br> records of outside sources |
| :--- | :--- |
| I.A. 3 | Evaluates relevance, quality, sufficiency, and depth of preliminary ideas and information, <br> organizes material generated, and formulates thesis |
| I.A. 4 | Recognizes the importance of revision as the key to effective writing |
| II.A.1 | Uses effective reading strategies to determine a written work's purpose and intended <br> audience |
| II.A. 2 | Uses text features and graphics to form an overview of informational texts and to determine <br> where to locate information |
| II.A.4 | Draws and supports complex inferences from text to summarize, draw conclusions, and <br> distinguish facts from simple assertions and opinions |
| II.A. 5 | Analyzes the presentation of information and the strength and quality of evidence used by <br> the author, and judges the coherence and logic of the presentation and the credibility of an <br> argument |
| II.D.1 | Describes insights gained about oneself, others, or the world from reading specific texts |
| III.A.1 | Understands how style and content of spoken language varies in different contexts and <br> influences the listener's understanding |
| III.A.2 | Adjusts presentation (delivery, vocabulary, length) to particular audiences and purposes <br> Participates actively and effectively in one-on-one oral communication situations |
| III.B.1 |  |

## Math Around Town (Grade 4)

III.B. 2 Participates actively and effectively in group discussions
III.B. 3 Plans and delivers focused and coherent presentations that convey clear and distinct perspectives and demonstrate solid reasoning
IV.A. 1 Analyzes and evaluates the effectiveness of a public presentation
IV.A. 2 Interprets a speaker's message; identifies the position taken and the evidence in support of that position
IV.A. 3 Uses a variety of strategies to enhance listening comprehension
IV.B. 1 Listens critically and responds appropriately to presentations
IV.B. 2 Listens actively and effectively in one-on-one communication situations
IV.B. 3 Listens actively and effectively in group discussions
V.A. 1 Formulates research questions
V.A. 2 Explores a research topic
V.A. 3 Refines research topic and devises a timeline for completing work
V.B. 1 Gathers relevant sources
V.B. 2 Evaluates the validity and reliability of sources
V.B. 3 Synthesizes and organizes information effectively
V.B. 4 Uses source material ethically
V.C. 1 Designs and presents an effective product

Mathematics:
I.A. 1 Compares real numbers
I.B. $1 \quad$ Performs computations with real and complex numbers
IV.D. 2 Applies probabilistic measures to practical situations to make an informed decision
VI.A. 1 Plans a study
VI.B. 1 Determines types of data
VI.B. 2 Selects and applies appropriate visual representations of data
VI.B. 4 Describes patterns and departure from patterns in a set of data
VIII.A. 1 Analyzes given information
VIII.A. 2 Formulates a plan or strategy
VIII.A. 3 Determines a solution
VIII.A. 4 Justifies the solution
VIII.A. 5 Evaluates the problem-solving process
VIII.B. 1 Develops and evaluate convincing arguments
VIII.B. 2 Uses various types of reasoning
VIII.C. 1 Formulates a solution to a real-world situation based on the solution to a mathematic problem
VIII.C. 2 Uses a function to model a real-world situation
VIII.C. 3 Evaluates the problem-solving process
IX.A. 1 Uses mathematical symbols, terminology, and notation to represent given and unknown information in a problem
IX.A. 2 Uses mathematical language to represent and communicate the mathematical concepts in a
problem
IX.A. 3 Uses mathematics as a language for reasoning, problem solving, making connections, and generalizing
IX.B. 1 Models and interprets mathematical ideas and concepts using multiple representations
IX.B. 2 Summarizes and interprets mathematical information provided orally, visually, or in written form within the given context
IX.C. 1 Communicates mathematical ideas, reasoning, and their implications using symbols, diagrams, graphs, and words
IX.C. 2 Creates and use representations to organize, record, and communicate mathematical ideas
IX.C. 3 Explains, displays, or justifies mathematical ideas and arguments using precise mathematical language in written or oral communications
X.A. 1 Connects and uses multiple strands of mathematics in situations and problems
X.A. 2 Connects mathematics to the study of other disciplines
X.B. $1 \quad$ Uses multiple representations to demonstrate links between mathematical and real-world situations
X.B. 2 Understands and uses appropriate mathematical models in the natural, physical, and social sciences
X.B. $3 \quad$ Knows and understands the use of mathematics in a variety of careers and professions

## Science:

I.A. 4 Relies on reproducible observations of empirical evidence when constructing, analyzing, and evaluating explanations of natural events and processes
I.B. $1 \quad$ Designs and conducts scientific investigations in which hypotheses are formulated and tested
I.C. 1 Collaborates on joint projects
I.E. 1 Uses several modes of expression to describe or characterize natural patterns and phenomena. These modes of expression include narrative, numerical, graphical, pictorial, symbolic, and kinesthetic
I.E. 2 Uses essential vocabulary of the discipline being studied
III.B. 2 Sets up apparatuses, carries out procedures, and collects specified data from a given set of appropriate instructions
III.B. 3 Recognizes scientific and technical vocabulary in the field of study and use this vocabulary to enhance clarity of communication
III.B. 4 Lists, uses, and gives examples of specific strategies before, during, and after reading to improve comprehension
III.C. 1 Prepares and represents scientific/technical information in appropriate formats for various audiences
III.D. 1 Uses search engines, databases, and other digital electronic tools effectively to locate information
III.D. 2 Evaluates quality, accuracy, completeness, reliability, and currency of information from any source
V.C. 1 Recognizes patterns of change.
V.E. 1 Uses models to make predictions.

## Math Around Town (Grade 4)

## Social Studies:

| I.F. 1 | Uses a variety of research and analytical tools to explore questions or issues thoroughly and fairly |
| :---: | :---: |
| I.A. 3 | Analyzes how physical and cultural processes have shaped human communities over time |
| I.A. 5 | Analyzes how various cultural regions have changed over time |
| III.B. 1 | Applies social science methodologies to compare societies and cultures |
| IV.A. 1 | Identifies and analyze the main idea(s) and point(s) of view in sources |
| IV.A. 2 | Situates an informational source in its appropriate contexts |
| IV.A. 3 | Evaluates sources from multiple perspectives |
| IV.A. 4 | Understands the differences between a primary and secondary source and use each appropriately to conduct research and construct arguments |
| IV.A. 5 | Reads narrative texts critically |
| IV.A. 6 | Reads research data critically |
| IV.B. 1 | Uses established research methodologies |
| IV.B. 3 | Gathers, organizes, and displays the results of data and research |
| IV.B. 4 | Identifies and collects sources |
| IV.C. 1 | Understands/interprets presentations critically |
| IV.D. 1 | Constructs a thesis that is supported by evidence |
| IV.D. 2 | Recognizes and evaluates counter-arguments |
| V.A. 1 | Uses appropriate oral communication techniques, depending on the context or nature of the interaction |
| V.A. 2 | Uses conventions of standard written English |
| V.B. 1 | Attributes ideas and information to source materials and authors |

## Cross-Disciplinary Standards:

I.A. 1 Engages in scholarly inquiry and dialogue
I.A. 2 Accepts constructive criticism and revises personal views when valid evidence warrants
I.B. 1 Considers arguments and conclusions of self and others
I.B. 2 Constructs well-reasoned arguments to explain phenomena, validates conjectures, or supports positions
I.B. 3 Gathers evidence to support arguments, findings, or lines of reasoning
I.B. 4 Supports or modify claims based on the results of an inquiry
I.D. 1 Self-monitors learning needs and seeks assistance when needed
I.D. 2 Uses study habits necessary to manage academic pursuits and requirements
I.D. 3 Strives for accuracy and precision
I.D. 4 Perseveres to complete and master tasks
I.E. 1 Works independently
I.E. 2 Works collaboratively
I.F. 1 Attributes ideas and information to source materials and people
I.F. 2 Evaluates sources for quality of content, validity, credibility, and relevance
I.F. 3 Includes the ideas of others and the complexities of the debate, issue, or problem

## Math Around Town (Grade 4)

| I.F. 4 | Understands and adheres to ethical codes of conduct |
| :---: | :---: |
| II.A. 1 | Uses effective prereading strategies |
| II.A. 2 | Uses a variety of strategies to understand the meanings of new words |
| II.A. 3 | Identifies the intended purpose and audience of the text |
| II.A. 4 | Identifies the key information and supporting details |
| II.A. 5 | Analyzes textual information critically |
| II.A. 7 | Adapts reading strategies according to structure of texts |
| II.A. 8 | Connects reading to historical and current events and personal interest |
| II.B. 1 | Writes clearly and coherently, using standard writing conventions |
| II.B. 2 | Writes in a variety of forms for various audiences and purposes |
| II.C. 1 | Understands which topics or questions are to be investigated |
| II.C. 2 | Explores a research topic |
| II.C. 3 | Refines research topic based on preliminary research and devise a timeline for completing work |
| II.C. 4 | Evaluates the validity and reliability of sources |
| II.C. 5 | Synthesizes and organize information effectively |
| II.C. 6 | Designs and present an effective product |
| II.C. 7 | Integrates source material |
| II.C. 8 | Presents final product |
| II.D. 1 | Identifies patterns or departures from patterns among data |
| II.D. 2 | Uses statistical and probabilistic skills necessary for planning an investigation and collecting, analyzing, and interpreting data |
| II.D. 3 | Presents analyzed data and communicate findings in a variety of formats |
| II.E. 1 | Uses technology to gather information |
| II.E. 2 | Uses technology to organize, manage, and analyze information |
| II.E. 3 | Uses technology to communicate and display findings in a clear and coherent manner |
| II.E. 4 | Uses technology appropriately |

## Attachment \#1

## Math Curse Problem Solutions

A. nine nephews and six nieces
B.1. yes, you will have nineteen extra minutes
B.2. sixty minutes
B.3. 32 teeth
C.1. eight shirts
C.2. seven shirts
D.1. four quarts
D.2. two pints
D.3. twelve inches
D.4. three feet
E.1. April
E.2. June
F.1. four desks
F.2. three desks
F.3. eight desks
F.4. twelve desks
F.5. 240 fingers and thumbs, 192 fingers without thumbs
F.6. 48 ears
F.7. 24 tongues
G.1. C
G.2. B and C
H.1. 400 million M\&Ms
1.3.>
J.1.a. $11,12,13,14,15$
K.1. one quarter $=25$ pennies
J.1.b. 12, 14, 16, 18, 20
K.2. five $\$ 1$ = one $\$ 5$
J.1.c. $21,34,55,89,144$
J.1.d. 11, 12, 13, 20, 21
K.3. one $\$ 1$ = one-hundred pennies
K.4. one \$5 = twenty quarters
J.1.e. 11, 100, 101, 110, 111

Attachment \#2
Math Curse Problem Categorization
Partners: $\qquad$
$\qquad$
Directions: Solve all of the problems found in Math Curse. Classify each problem by putting a checkmark in the proper column.

| Problem | Answer | Basic <br> facts | Basic <br> math <br> problem <br> solving | Higher- <br> level <br> math <br> problem <br> solving | You've <br> got a <br> problem, <br> but it <br> isn't <br> math | You <br> asked <br> the <br> wrong <br> question <br> math <br> problem |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

## Parallel Problems

## Attachment \#4

Pizza Party

## Directions to Student:

Your class has decided to have pizza for the end-of-school party. You have raised $\$ 60$. You must decide which pizza restaurant has the best price. Don't forget the $8.5 \%$ sales tax. The local pizza parlors are listed below.

## Pizza Prices

|  | Small <br> (one <br> topping) | Medium <br> (one <br> topping) | Large <br> (one topping) | Drinks | Delivery <br> Charge |
| :--- | :---: | :---: | :---: | :--- | :--- |
| Pizza-a-Go-Go | $\$ 6.25$ <br> Serves 6 | $\$ 7.49$ <br> Serves 8 | $\$ 8.50$ <br> Serves 10 | One free <br> bottle of soda <br> with each <br> pizza <br> purchased | \$1/pizza |
| Pizza Palace | $\$ 4.29$ <br> Serves 4 | $\$ 7.30$ <br> Serves 6 | $\$ 10.25$ <br> Serves 8 <br> Special: Buy 1, <br> Get 1 Free | \$2.50/ bottle | No <br> delivery <br> charge |
| Dough Town | $\$ 4.99$ <br> Serves 4-6 | $\$ 8.50$ <br> Serves 6-8 | $\$ 9.69$ <br> Serves 8-10 | Buy 1 bottle <br> at \$2.19, get 1 <br> free | \$2.50 |

Assume that there are 25 students in your class and that each person (including your teacher) will eat two slices. Also assume that the slices of pizza are all the same size. Considering only the price, where should you buy the pizza? How many pizzas will you need? Assume each bottle of soda is 2 liters and will serve four people. How many bottles of soda will you need?

Please show all your work on the page that follows, and write a brief description of how you decided on your answer.

## Mathematical knowledge and skills:

- Number, operation, and quantitative reasoning
- Patterns, relationships, and algebraic thinking
- Probability and statistics
- Underlying processes and mathematical tools

Adapted from Danielson, C., \& Marquez, E. (1998). A collection of performance tasks and rubrics: High school mathematics. Larchmont, NY: Eye on Education.

Where would you buy your pizza? $\qquad$

How many pizzas will you need? $\qquad$

How many liters of soda will you need? $\qquad$

Write a description of how you decided on your answers.

## Attachment \#5

## Cover It Up

## Directions to Student:

You are going to paint your bedroom using two coats of paint. To select the color of paint you would like to use, visit one of the following websites:

- http://www.behr.com/Behr/home\#
- http://www.benjaminmoore.com/bmpsweb/portals/bmps.portal? nfpb=true\& pageLabel=f h home
- http://www.sherwin-williams.com/do it yourself/paint colors/paint color palette/

Once you have selected your color, you need to determine the cost of the paint. Calculate the number of cans of paint that you will need and their cost from a store in your community.

To find the cost of the paint, you will need to:

- Measure and calculate the area of the walls in your bedroom;
- Determine how much area a single can of paint will cover (usually stated on the can itself);
- Calculate the number of cans required for two coats of paint;
- Calculate the amount the paint will cost;
- Calculate the cost of other supplies (e.g., brushes, tape); and
- Describe in words how you found your solution.

Use the grid on the page that follows to draw a scaled floor plan of your room. Show all your work, and present it in a form that is neat and easy to read.

## Mathematical knowledge and skills:

- Number, operation, and quantitative reasoning
- Geometry and spatial reasoning
- Measurement
- Underlying processes and mathematical tools

Adapted from Danielson, C., \& Marquez, E. (1998). A collection of performance tasks and rubrics: High school mathematics. Larchmont, NY: Eye on Education.

Total area of bedroom walls: $\qquad$

Area one gallon of paint will cover: $\qquad$

Number of cans required for two coats of paint: $\qquad$

Cost of one gallon of paint: $\qquad$

Cost to paint your bedroom: $\qquad$

Describe in words how you found your solution.

## Interview Questions \& Answers

Name of person being interviewed: $\qquad$

Occupation: $\qquad$

Date and time of interview: $\qquad$

What do you do during a typical day?
$\qquad$
$\qquad$
$\qquad$

What services do you provide?
$\qquad$
$\qquad$
$\qquad$

How do you use math on your job?

How has the way a $\qquad$ uses math changed over time?

## Math Around Town (Grade 4)

What math tools did a $\qquad$ use in the past that are no longer used?
$\qquad$
$\qquad$
$\qquad$

What math tools does a $\qquad$ use now that were not used in the past?
$\qquad$
$\qquad$
$\qquad$

Question: $\qquad$
$\qquad$

Answer: $\qquad$

## Attachment \#8

## Job-related Math Skills

Below is a simplified list of the Texas Essential Knowledge and Skills (TEKS) for grades 3-8. Please check all skills that the professional uses in his/her job.

## Numbers, Operations, and Quantitative Reasoning

|  | Addition | Subtraction | Multiplication | Division | Powers | Roots |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Whole |  |  |  |  |  |  |
| Fractions |  |  |  |  |  |  |
| Decimals |  |  |  |  |  |  |
| Percents |  |  |  |  |  |  |
| Negatives |  |  |  |  |  |  |

$\qquad$ Read and write numbers
___ Compare and/or order numbers
___ Convert between fractions, decimals, and percents
___ Use factors and/or multiples
___ Use scientific notation
___ Round to estimate
___ Use reasonableness of answers to check for accuracy

## Patterns, Relationships, Algebraic Thinking

$\qquad$ Use formulas
___ Use ratios/proportional relationships
___ Use patterns and/or sequences
$\qquad$ Use rates

## Geometry and Spatial Reasoning

Use geometric shapes to:
$\qquad$ Draw solids from different perspectives (top, side, front, etc.)
___ Make models
___ Solve problems

Use geometric terms (check all the apply):

## Angles

$\qquad$ Acute
___Obtuse $\qquad$ Supplementary
$\qquad$ Right $\qquad$ Complementary

## Polygons

___ Triangle $\qquad$ Square $\qquad$ Rectangle $\qquad$ Quadrilateral
$\qquad$ Pentagon $\qquad$ Hexagon

## Solids

| Vertices Cone | $\qquad$ Edges <br> Prism | Faces Cylinder | Pyramid <br> Rectangular prism |
| :---: | :---: | :---: | :---: |
| Lines |  |  |  |
| Parallel | Perpendicular |  |  |
| Circle |  |  |  |
| Diameter | Radius | Circumference |  |
| Translations | Reflections | Coordinate plane |  |
| Rotations | Symmetry |  |  |

Attachment \#9
Interview Math Problems

Name of person being interviewed: $\qquad$

Occupation: $\qquad$

Samples of math problems that the interviewee encounters on the job:

| 1. |  |
| :--- | :--- |

# Attachment \#10 <br> Career-based Mathematics Problems 

## Movie Mania

## Directions to Student:

You have just been promoted to manager of a movie theatre. Figure out how many employees you would need to schedule based on a one-to-fifty employee-to-moviegoer ratio-that is, for every fifty moviegoers there is one employee. You have twelve employees, and no one can work over eight hours per day. Develop a weekend schedule for your employees based on this information. Some employees have some restrictions on when they can work. Employee A cannot work after 6:00 PM. Employees B and D have to work the same shift as they carpool. Employee F cannot come in before 3:00 PM on Saturday. Employee G cannot work on Sunday.

Use Table 1 to help you complete Table 2 for Saturday. Then complete Table 3 for Sunday when 10\% fewer people attend the movies than on Saturday.

| Time Periods | Number of <br> Moviegoers on a <br> Typical Saturday | Number of <br> Employees Needed <br> on Saturday | Number of <br> Moviegoers <br> on a Typical <br> Sunday | Number of <br> Employees <br> Needed on <br> Sunday |
| :--- | :---: | :---: | :---: | :---: |
| 12 noon to 2:00 <br> PM | 205 |  |  |  |
| 2:00 PM to 4:00 <br> PM | 277 |  |  |  |
| 4:00 PM to 6:00 <br> PM | 353 |  |  |  |
| 6:00 PM to 8:00 <br> PM | 409 |  |  |  |
| 8:00 PM to <br> 10:00 PM | 351 |  |  |  |
| 10:00 PM to 12 <br> midnight | 245 |  |  |  |

Table 1. Employee-to-moviegoer ratio.

| Employee | Start Time | End Time |
| :--- | :--- | :--- |
| A |  |  |
| B |  |  |
| C |  |  |
| D |  |  |
| E |  |  |
| F |  |  |
| G |  |  |
| H |  |  |
| I |  |  |
| J |  |  |
| K |  |  |
| L |  |  |

Table 2. Employee schedule for Saturday.

| Employee | Start Time | End Time |
| :--- | :--- | :--- |
| A |  |  |
| B |  |  |
| C |  |  |
| D |  |  |
| E |  |  |
| F |  |  |

Table 3. Employee schedule for Sunday.

The average moviegoer spends $\$ 5.00$ or less on snacks. Using the price chart, determine how many movie meals of three items each could be offered. No more than one from each category (e.g., beverages, popcorn, candy, other food items) can be used.

| Item | Cost |
| :--- | :---: |
| Hot dog | $\$ 2.50$ |
| Pickle | $\$ 1.00$ |
| Nachos | $\$ 2.25$ |
| Small unbuttered popcorn | $\$ 1.75$ |
| Small buttered popcorn | $\$ 2.00$ |
| Large unbuttered popcorn | $\$ 2.75$ |
| Large buttered popcorn | $\$ 3.00$ |
| Small candy | $\$ 1.50$ |
| Large candy | $\$ 2.25$ |
| Small drink | $\$ 1.00$ |
| Medium drink | $\$ 1.25$ |
| Large drink | $\$ 1.50$ |
| Bottled water | $\$ 1.50$ |
| Tabie\| |  |

Table 4. Itemized cost of snacks.

Use Movie Meals to determine all the possibilities.

| Items Costs | Items Costs | Items Costs |
| :---: | :---: | :---: |
| 1. | 1. | 1. |
| 2. | 2. | 2. |
| 3. | 3. | 3. |
| Total | Total | Total |

## Math Around Town (Grade 4)

| Items Costs | Items Costs | Items Costs |
| :---: | :---: | :---: |
| 1. | 1. | 1. |
| 2. | 2. | 2. |
| 3. | 3. | 3. |
| Total | Total | Total |

Develop a movie schedule so that six movies show three times a day in four theatres with fifteen-minute intervals. Stagger the times so that long lines will not build in front. Name the movies showing at your theatre.
1.
2.
3.
4.
5.
6.

On a separate sheet of paper, develop a table to show the schedule. Include the name of the movie, the screen on which it will appear, and starting and ending times.

# Attachment \#11 <br> Career-based Mathematics Problems <br> <br> TV Show 

 <br> <br> TV Show}

## Directions to Student:

A TV/radio/movie producer has asked you to make recommendations about a new production. The producer wants to create a weekly show that will appeal to a certain age group, and she needs your help. What types of shows do you think people in various age groups like? What types of shows do you think they would watch or listen to?

Devise a method to answering these questions, and then write a letter to the producer with your recommendations. You should:

- Select a sample of people to survey. This sample could be your own class, another class in your school, a group of people in your neighborhood, an athletic team, or any other group. Think about how large a group of people you will need to draw a sufficient conclusion.
- Design and conduct a survey of people in that age group.
- Organize and analyze the information you receive from the surveys.
- Determine whether the preferences you found in your survey seem to be typical of the population of that age group as a whole.
- Prepare a visual representation of the information in a table, graph, or chart.
- Draw conclusions from the types of shows your survey respondents like and make your recommendations to the producer.

## Mathematical knowledge and skills:

- Number, operation, and quantitative reasoning
- Probability and statistics
- Underlying processes and mathematical tools

Adapted from Danielson, C., \& Marquez, E. (1998). A collection of performance tasks and rubrics: High school mathematics. Larchmont, NY: Eye on Education.

Group surveyed: $\qquad$

Number in group: $\qquad$

Age and other characteristics of group: $\qquad$

| Survey Question | Responses |
| :--- | :--- |

Survey findings:
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

Now that you have investigated the age group's preferences, write a report to the producer that includes your findings and recommendations.

# Attachment \#12 <br> Career-based Mathematics Problems <br> Golf Course Construction 

## Directions to Student:

Construct an operational miniature golf course using reusable and recyclable materials. In order to meet course regulations, use the following criteria:

- Each hole, from tee to fairway, green, and cup, must be designed within an area of nine-to-ten square feet. Submit a scale drawing of the hole for review.
- Each hole must have barriers to keep the ball contained while in play. Barrier designs should include parallel and perpendicular lines and a right, obtuse, or acute angle.
- Using trans/ations, reflections, and rotations, show other possibilities of how the hole could appear on the golf course.
- The hole must be constructed from reusable and recyclable items. The total construction cost of each hole must not exceed \$1.00. Document the cost by completing a budget sheet listing the fair market value of each item used in construction. (For example, $\$ .05$ is fair market value for each aluminum can.)
- The ball must change elevation while in play.
- Each hole must include a cup on the green that will contain the ball.
- Each hole should be decorated to reflect a theme.

## Mathematical knowledge and skills:

- Number, operation, and quantitative reasoning
- Geometry and spatial reasoning
- Measurement
- Underlying processes and mathematical tools

Use two pages or more to provide details about the construction of your golf course, including an indepth explanation of one of the holes.
